

**International Association of Chinese Professionals in
Global Positioning Systems (CPGPS)**

6th CPGPS Forum

**January 9-11, 2014
Xuzhou, Jiangsu, China**

The modern Global Navigation Satellite System (GNSS) now is entering its new era with as the Chinese BeiDou Navigation Satellite System (BDS) established its regional service capability. Along the rapid development of the BDS, many opportunities arise for the GNSS industry and researchers. The integration of BDS with other existing GNSS technologies for an optimal PNavT (Positioning, Navigation, Velocity and Timing) solution still remains a challenge.

This 6th CPGPS forum to be held at Xuzhou, Jiangsu, China during January 9-11, 2014 will be an ideal platform for the academia and industry researchers to share the latest research progress in the GNSS technologies and their applications, particularly those related to BDS.

You are invited to submit your abstract(s) in English to the Local Organization Committee.
