

Interview by RTHK31 - JUPAS Programme Introduction

On behalf of Department of Land Surveying and Geo-Informatics (LSGI), Ir Dr Wallace Lai, Associate Professor and Leader of Bachelor Programme of LSGI, was invited to RTHK31 “網上問功課 同行抗疫” episode 25 on 23 April 2020 to share the LSGI’s undergraduate programmes, applications and career development of LSGI’s disciplines.

Due to the coronavirus, this year, candidates of HKDSE have faced a lot of challenges and pressure. Students wish to receive more information on different JUPAS programmes in order to give the most suitable selection for their undergraduate study. LSGI is one of a few undergraduate programmes being invited by RTHK to share in this information program.

Dr Lai shared some common applications of LSGI disciplines, including smart transportation, COVID-19 dashboard, 3D mapping and modelling, planet probe, underground utility diagnosis, etc. It also included some useful information for JUPAS candidates for applying LSGI programmes. We wish all HKDSE candidates can achieve outstanding results and enroll in their favorite choices of programme.

More information on LSGI undergraduate programmes:

[BSc\(Hons\) in Land Surveying and Geo-Informatics \(JS3387\)](#)

[HD in Land Surveying and Geo-Informatics \(JS3105\)](#)
