

Research Engineer

Esri China (Hong Kong) is the pioneering company in GIS industry and in the region. We are seeking capable people to excel the talents and to work for our family.

Job Descriptions:

- Carry out research and development tasks based on Esri GIS software for the development of Smart City for Hong Kong under 3D, Artificial Intelligence, Big Data and Spatial Analytics domains;
- Carry out testing and develop prototypes for researched results;
- Document research results properly and produce progress report;
- Share and present researched results and developed prototypes to public and customers in any circumstances;
- Supervise assistant research engineer whenever available;
- Work location at Hong Kong Science and Technology Parks (HKSTP); and
- Successful candidate will be employed on a contract basis subject to renewal.

Requirements:

- Doctoral Degree in Computer Science, Information Technology, Geomatics, Computer Graphics, Mathematics and Statistics or related discipline;
- Hands-on experience in using Esri GIS software will be an advantage;
- Hands-on experience in web programming;
- Hands-on experience in VB.NET, C#, Java, Javascript, HTML5, etc.; and
- Good command of both spoken and written in Chinese and English.

We offer five-day work week, attractive career opportunities, remuneration and benefits to the right candidates. Interested applicants, please submit detailed resume with current & expected salary and date of availability to Human Resources Department, Esri China (Hong Kong) Limited, 9/F., CEO Tower, 77 Wing Hong Street, Cheung Sha Wan, Kowloon, Hong Kong; or via e-mail to job@esrichina.hk.
