The Most Fyndable Firm in
Smart City Group

AMBIT is the largest City Big Data provider in Hong Kong, we captured intelligent geographic information and its attribute throughout the city by automatic approach. We deliver total solution ranging from acquisition, post processing, analysis as well as dissemination of City Big Data to corporate users. High resolution city data are collected seamlessly through aerial and terrestrial systems developed by our patented technologies. Our professional data collection media including drone, large scale aerial camera and vehicle/backpack mobile mapping system (MMS). Using our expertise in 3D geographic information system (GIS), we developed series of smart city applications ride on our City Big Data infrastructure. Over decade our team worked together with various engineering disciplines using innovative geospatial technologies to resolve project challenges both in Hong Kong and internationally. Our technology generates strategic information with multiple perspectives that helps risk management and progress monitoring during national development. Our smart city solution serves wide range of industry in agricultural, environmental, survey mapping, urban planning as well as construction applications; where high resolution accurate data is the key.
