Pui Ching Middle School Visited LSGI

A group of F.6 students from Pui Ching Middle School visited Department of Land Surveying and Geo-Informatics (LSGI) on 7 January 2015 to understand the programmes that LSGI offered and the characteristics of the department.

Mr. Kent Lam introduced the subjects and the programmes on offer, their admission requirements and career prospects of the graduates. 3 BSc students shared their study life at LSGI, their internship experience and exchanging to a foreign university. After that, Dr. George Liu showed the GNSS instruments to the student and explained the function of the instruments. The students then visited the Underground Utility Survey Laboratory where Dr. Wallace Lai demonstrated how ground penetrating radar (GPR) was used to study and map the subsurface in 3D.

The visit programme was well received from the teachers and students. LSGI is pleased to welcome the visits from the secondary schools in future and it is definitely a good opportunity for the youngsters to better understand their study and career path in addition to the programmes offered by LSGI.
